PROFESSIONAL SUMMARY

Backend Developer specializing in **Node.js** and **NestJS**, with hands-on experience building scalable backend systems and RESTful APIs for real-world applications. Skilled in designing modular, secure, and maintainable architectures using **PostgreSQL**, **Redis**, and modern backend development practices. Experienced in implementing authentication, business workflows, real-time features, and third-party integrations. Passionate about clean code, system design, and building reliable backend solutions that deliver strong user and business value.

Technical Skills

- **Programming:** JavaScript, TypeScript, PHP, Python, C++, Dart.
- **Backend:** Node.js, NestJS, Express.js, Laravel, RESTful APIs.
- **Databases**: PostgreSQL, MySQL, Redis, SQL, NoSQL.
- **Frontend:** HTML, CSS, Bootstrap, Tailwind CSS, Flutter.
- **Tools & Workflow:** Git, GitHub, GitLab, Agile, Jira, Swagger/OpenAPI.

Experience

Freelance Full Stack / Backend Developer

Independent Projects – Remote | 6 Months

- Developed and maintained **scalable backend systems** using **Node.js**, **NestJS**, and **Express.js**, integrating **PostgreSQL**, **Redis**, and **RESTful APIs.**
- Designed and implemented **secure authentication systems**, **role-based access control**, and **business workflows** for multiple client projects.

- Built and integrated **smart cart systems, order lifecycle management, and payment workflows** for e-commerce platforms.
- Developed **real-time features** using **Firebase Realtime Database** and **push notifications** for user engagement and operational tracking.
- Created **frontend interfaces** using **HTML, CSS, Bootstrap, Tailwind**, and **Flutter** to support responsive client-side applications.
- Implemented **automated background jobs** and **cron-based tasks** for notifications, inventory handling, and system maintenance.
- Delivered full development cycle independently, from **requirements gathering** to **deployment**, demonstrating problem-solving, innovation, and ownership.

Projects

Jeeb – Delivery Platform Backend (In Progress) :

- Built and maintained a scalable backend for a multi-service delivery platform using **NestJS**, **PostgreSQL**, and **Redis**.
- Developed core business modules including **authentication**, **orders**, **wallet**, **payments**, **loyalty**, and **real-time tracking**.
- Designed a modular backend architecture with secure role-based access, background job processing, and API-driven integrations.

Shehrezad – E-commerce Backend System :

- Developed a scalable e-commerce backend system using **Node.js**, **Express.js**, and **MySQL**.
- Implemented core backend features including **smart cart reservation**, **order lifecycle management**, **coupon logic**, and **multi-role authentication**.
- Built integrations for push notifications, image/file handling, and automated background tasks to support business operations.
- Designed backend workflows for inventory handling, customer orders, payment methods, and administrative control.

Education

B.Sc. in Informatics Engineering – Software Engineering & Information Systems
Tishreen University – Latakia, Syria.

Industrial Technical Secondary School – Computer Techniques
Ranked 1st at the Governorate Level.

Languages

- **Arabic:** Native.
- **English:** Intermediate (professional terminology proficiency).
