PROFESSIONAL SUMMARY

Laravel Developer with strong experience in building scalable web applications using PHP and Laravel framework. Skilled in developing RESTful APIs, authentication systems, and database-driven applications with MySQL. Experienced in designing clean and maintainable backend architectures for real-world projects including e-commerce and management systems. Passionate about writing clean code, solving complex problems, and delivering efficient and reliable web solutions. Strong ability to work in team environments and continuously improve technical skills.

EXPERIENCE:

Freelance Laravel Developer | Remote:

- Developed web applications and **RESTful** APIs using Laravel and **PHP**.
 - Built authentication systems, role-based access control, and database-driven solutions.
 - Designed and maintained MySQL databases and backend workflows.
 - Delivered client-focused solutions from development to deployment.
-

Technical Skills

- **Programming:** PHP, JavaScript.
 - **Backend:** Laravel, RESTful APIs, MVC Architecture, Authentication, Eloquent ORM, API Development.
 - **Databases:** MySQL.
 - **Frontend:** HTML, CSS, Bootstrap, Tailwind.
 - **Tools & Workflow:** Git, GitHub, GitLab, Agile, Jira, Swagger/OpenAPI.
-

Projects:

SmartShip – Parcel Delivery Management System (Final Year Project)

- Developed a parcel delivery management system using **Laravel** and **REST APIs**.

- Implemented shipment tracking, order management, and role-based access control.
- Built real-time parcel status tracking and workflow management features.

StitchHub – Tailoring E-Commerce Platform

- Developed an e-commerce platform using Laravel and Blade.
- Implemented product management, shopping cart, billing, and user management modules.
- Built an admin dashboard with CRUD operations and multilingual support.

BeautyHub – Service Management System:

- Developed a backend service management system using API-driven architecture concepts.
- Implemented authentication, user management, and appointment handling features.
- Designed modular backend structure to support integration with frontend applications.
- Focused on secure authentication flows and scalable backend design principles.

CutOptimizer – Optimization Tool (Freelance Project):

- Developed an optimization tool to reduce material waste using algorithmic logic.
- Built a simple interface for data input and processing.
- Implemented export functionality for generating reports in Excel and PDF formats.
- Improved efficiency of cutting operations through optimized calculations.
- Delivered the project independently from development to deployment.

Education

B.Sc. in Informatics Engineering – Software Engineering & Information Systems

Tishreen University – Latakia, Syria

Industrial Technical Secondary School – Computer Techniques

Ranked 1st at the Governorate Level

Languages

- **Arabic:** Native
- **English:** Intermediate (professional terminology proficiency)
