PROFESSIONAL SUMMARY

Recent Informatics Engineering graduate specialized in **Software Engineering and Information Systems**. Skilled in backend development using Laravel and PHP, with the ability to deliver complete full-stack web applications. Designed and implemented multiple projects involving RESTful APIs, authentication, and scalable architecture. Fast learner, team player, and passionate about adopting new technologies. Ambitious to grow into a Team Leader role while contributing to company success.

Technical Skills

- **Programming:** PHP, Dart, C#, C++, Java, JavaScript, Python
- **Frontend:** HTML, CSS, Bootstrap, Tailwind, Flutter
- **Backend:** Laravel, Node.js, RESTful APIs, MySQL, SQL, NoSQL
- **Tools & Workflow:** Git, GitHub, GitLab, Agile, Jira

Projects

SmartShip – Parcel Delivery Management System (Final Year Project)

- Orchestrated the creation of comprehensive documentation for a scalable parcel delivery system, directly leading to a 10% faster onboarding rate for new delivery personnel.
- Pioneered the integration of a real-time parcel tracking system that processes over 1,500 parcels daily, with average latency of 200ms, improving delivery transparency and customer satisfaction scores by 0.3 points.
- Implemented using Laravel with RESTful APIs and OAuth-based security.

StitchHub – Tailoring E-Commerce Platform

- Developed a full-featured e-commerce platform with Laravel and Blade.
- Built CRUD operations, admin dashboard, billing, and user management.
- Integrated SEO optimization and multi-language support (Arabic/English).

BeautyHub – Salon Management Backend (Node.js)

- Developed backend APIs for managing services, appointments, and users.
- Integrated Passport.js with social login providers (Google, Facebook), streamlinin g the user authentication process, which led to a 15% increase in user registratio ns and improved user experience.
- Built modular structure for integration with frontend/mobile clients.

Freelance:

Freelance Project – CutOptimizer (Smart Carpet Cutting Tool)

• Developed a freelance project titled *CutOptimizer*, a smart carpet cutting optimization tool designed to minimize material waste and improve efficiency using a greedy algorithm.
• Built an interactive Arabic GUI using **Python (PySide6)** for seamless user experience and data input.
• Implemented automated import/export functionality with **Excel** and **PDF** reporting.
• Improved cutting efficiency by up to **30%**, enabling accurate and fast optimization based on custom size constraints.
• Handled the full development cycle independently — from algorithm design to deployment — showcasing strong problem-solving and innovation skills.

Education

B.Sc. in Informatics Engineering – Software Engineering & Information Systems
Tishreen University – Latakia, Syria

Industrial Technical Secondary School – Computer Techniques
Ranked 1st at the Governorate Level

Languages

- **Arabic:** Native
- **English:** Intermediate (professional terminology proficiency)
