PROFESSIONAL SUMMARY

Full Stack Developer experienced in building end-to-end web and mobile applications. Skilled in backend development using Laravel, Node.js, and NestJS, and frontend/mobile development using Flutter, HTML, CSS, and JavaScript. Experienced in designing scalable architectures, RESTful APIs, authentication systems, database design, and modern user interfaces. Passionate about delivering complete software solutions from concept to deployment.

EXPERIENCE:

Freelance Full Stack Developer | Remote:

- Developed end-to-end web and mobile applications using Laravel, NestJS, and Flutter.
 - Designed and implemented RESTful APIs, authentication systems, role-based access control, and business workflows.
 - Built responsive user interfaces and integrated them with backend services and databases.
 - Developed and optimized database schemas using PostgreSQL, MySQL, SQLite, and Redis.
 - Implemented real-time features, push notifications, reporting systems, and background job processing.
 - Delivered complete software solutions independently, from requirements analysis and system design to deployment and maintenance.
-

Technical Skills

- **Programming Languages:** Dart, JavaScript, TypeScript, PHP.
 - **Mobile Development:** Flutter, Responsive UI, Adaptive Layouts, Material Design, Cross-Platform Development.
 - **Frontend:** HTML, CSS, Bootstrap, Tailwind CSS.
 - **Backend & APIs:** RESTful APIs, Firebase, Node.js, NestJS, Express.js, Laravel.
 - **Databases & Storage:** Drift (Moor), SQLite, SharedPreferences, PostgreSQL, MySQL, Redis, SQL, NoSQL.
 - **UI/UX & Visualization:** Glassmorphism UI, Custom Widgets, Animations, Interactive Dashboards, fl_chart.
 - **Reports & File Handling:** Excel Processing, PDF Generation, File Import/Export Systems.
 - **Tools & Workflow:** Git, GitHub, GitLab, Agile, Jira, Swagger/OpenAPI.
-

Projects

Shift Pay – Smart HR & Financial Management System

- Developed a full business management solution using Flutter and modern backend services.
- Implemented payroll, attendance, inventory, and reporting systems.
- Designed scalable architecture and analytics dashboards.

Jeeb – Delivery Platform

- Developed scalable backend services using NestJS, PostgreSQL, and Redis.
- Built modules for authentication, orders, wallet management, loyalty systems, and payments.
- Implemented real-time tracking, notifications, and background job processing.
- Designed modular architecture with secure role-based access control and API integrations.

Shahrazad – E-Commerce Platform

- Developed a scalable e-commerce platform using Node.js, Express.js, and MySQL.
- Implemented smart cart reservation, order lifecycle management, coupon systems, and multi-role authentication.
- Built integrations for notifications, file management, and automated background tasks.
- Designed business workflows for inventory, orders, payments, and administrative operations.

SmartShip – Parcel Delivery Management System

- Developed a parcel delivery management system using Laravel and MySQL.
- Implemented shipment tracking, order management, and role-based access control.
- Built real-time parcel status tracking and delivery workflow management features.
- Designed RESTful APIs and backend services to support operational processes.

Education

B.Sc. in Informatics Engineering – Software Engineering & Information Systems

Tishreen University – Latakia, Syria

Industrial Technical Secondary School – Computer Techniques

Ranked 1st at the Governorate Level

Languages

- **Arabic:** Native | **English:** Intermediate (professional terminology proficiency)
